# EDUARDO SALGADO-LICEAGA

Washington, D.C. | (202) 595-5801 | eddy9202003@gmail.com | linkedin.com/in/edu-sal | github.com/edu-sal

## EDUCATION

**American University, College of Arts and Sciences** **Washington, DC**

*Bachelor of Science in Statistics*

Specialization: Applied Statistics; Minor: Mathematics May 2027

**GPA: 3.91**

**Coursework:** Mathematical Statistics, Regression, Linear Algebra, Data Mining, Machine Learning, Advanced Machine Learning, Numerical Analysis, Database and AI (SQL)

## WORK EXPERIENCE

**Curfimex S.A. de C.V.** **León, Guanajuato, Mexico**

*Data Scientist Intern (Full-Time, Unpaid)* *May 2026 - Aug 2026*

- Organized and checked Excel cost records for Curfimex's tanning and leather-processing operations, using company context to identify batches, customers, and materials.
- Used Codex as the primary coding assistant to build Python, Dash, and Plotly dashboards, refining prompts to compare monthly costs, cost per kilogram, and variable and allocated fixed costs.
- Compared outputs with source records and prepared Pareto (80/20) charts and Excel summaries of chemical costs, adjustments, and water and ice use in tanning.

**FinEx Concierge Solutions, LLC** **Washington, DC**

*Data Analyst Intern (Part-Time, Unpaid)* *May 2025 - Aug 2025*

- Extracted and organized data from ABCA PDF reports for a brief cannabis market research project.
- Used Codex as the primary coding assistant to create Python dashboards and Excel summaries, refining prompts around the research questions and reported figures.
- Summarized findings in charts and presentation slides for review with the project team.

## RESEARCH AND PROJECT EXPERIENCE

**American University - Department of Mathematics and Statistics** **Washington, DC**

*Undergraduate Research Assistant (Part-Time)* *May 2026 - Aug 2026*

- Used AI as the primary coding assistant to adapt a Python matrix-factorization baseline using MovieLens ratings, documenting the model and evaluation in a Jupyter notebook.
- Ran experiments with three random seeds and interpreted rating-prediction error, top-10 recommendation quality, and the range of movies recommended using tables and plots.

**George Hacks x UN Reboot the Earth Hackathon** **Washington, DC**

*Business & Presentation Contributor* *Apr 2026*

- Collaborated with software engineering students on FoodBridge, an AI-powered meal-planning prototype, using AI tools to help refine its business concept and presentation.
- Presented FoodBridge with the team at a student hackathon, where the team placed 1st in the UN/FAO track.

**Goldman Sachs Case Competition** **Washington, DC**

*Team Lead (Student Case Competition)* *Apr 2026*

- Led a five-person student team in a case competition about a fictional university's endowment and funding needs.
- Worked with teammates to compare options against the case's budget and investment restrictions, then presented the team's findings and recommendations.

## SKILLS

**Tools:** Python, R, pandas, NumPy, openpyxl, Excel, Power BI, Plotly, Dash, Git/GitHub, Codex; SQL (coursework)

**Methods:** Excel/PDF data extraction, data cleaning, exploratory analysis, descriptive statistics, regression, data visualization, model evaluation

**AI-assisted work:** Prompt design and refinement, coding and debugging with Codex, reviewing outputs in context
