EDUARDO SALGADO-LICEAGA

Washington, D.C. | (202) 595-5801 | eddy9202003@gmail.com | linkedin.com/in/edu-sal | github.com/edu-sal

EDUCATION

American University, College of Arts and Sciences **Washington, D.C.**
Bachelor of Science in Statistics
Specialization: Applied Statistics; Minor: Mathematics Expected May 2027
GPA: 3.91
Coursework: Linear/Numerical Linear Algebra, Probability, Multivariate Calculus, Mathematical Statistics, Regression, Data Mining, Advanced Machine Learning, Neural Networks/Deep Learning, Databases/SQL, Big Data Computing.

WORK EXPERIENCE

Curfimex S.A. de C.V. **León, Guanajuato, Mexico**
Data Scientist Intern (Full-Time, Unpaid) *May 2026 - Aug 2026*
- Organized and checked Excel cost records for Curfimex's tanning and leather-processing operations, using company context to identify batches, customers, and materials.
- Developed Python, Dash, and Plotly dashboards with Codex as the primary coding assistant, refining prompts to compare monthly costs, cost per kilogram, and variable and allocated fixed costs.
- Compared outputs with source records and prepared Pareto (80/20) charts and Excel summaries of chemical costs, adjustments, and water and ice use in tanning.

FinEx Concierge Solutions, LLC **Washington, D.C.**
Data Analyst Intern (Part-Time, Unpaid) *May 2025 - Aug 2025*
- Extracted and organized data from ABCA PDF reports for a brief cannabis market research project.
- Created Python dashboards and Excel summaries with Codex as the primary coding assistant, refining prompts around research questions and reported figures.
- Communicated market research findings to the project team through charts and presentation slides.

RESEARCH AND PROJECT EXPERIENCE

American University - Department of Mathematics and Statistics **Washington, D.C.**
Undergraduate Research Assistant (Part-Time) *May 2026 - Aug 2026*
Faculty mentor: Dr. Zois Boukouvalas, Graduate Director of AU's MS in Data Science and MS in Artificial Intelligence programs.
- Adapted a PyTorch logistic matrix-factorization recommender using MovieLens 100K with AI as the primary coding assistant; documented the model and evaluation in Jupyter.
- Compared ranking quality, recommendation popularity, and catalog coverage across five random seeds, evaluating a post-training popularity adjustment against the baseline.
- Reviewed research literature and discussed experimental methods, findings, and limitations with faculty mentor.

George Hacks Hackathon **Washington, D.C.**
Business & Presentation Contributor *Apr 2026*
- Collaborated with software engineering students on FoodBridge, an AI-powered meal-planning prototype, using AI tools to help refine its business concept and presentation.
- Presented FoodBridge with the team; the team placed 1st in the hackathon's UN/FAO track.

Goldman Sachs Case Competition **Washington, D.C.**
Team Lead (Student Case Competition) *Apr 2026*
- Led a five-person team in a student case competition about a fictional university's endowment and funding needs.
- Compared options with teammates against the case's budget and restrictions; presented findings and recommendations.

SKILLS

Computer: Python, PyTorch, pandas, Excel, Plotly, Dash, Git/GitHub, Codex; R, SQL and Apache Spark (coursework)
Data analysis: Data cleaning, exploratory analysis, data visualization, AI-assisted coding and output review
Machine learning (coursework): Feature engineering, cross-validation, regularization, PCA, SVMs and model evaluation
Personal skills: Team collaboration, leadership, oral presentations and communicating analytical findings
